An interactive map reporting the status of Digital Rights across the planet.
**Sirocco** is an interactive map providing an overlook of the state of Digital Rights all around the globe.

It provides a layered interface that allows granular filtering, enabling users to have a consolidated view that can be customized by their personal attributes.

**Sirocco** assists in establishing a legal framework of reference of the state Digital Rights looking at user data protection laws worldwide and other forms of metrics.

The project is the result of the collaborative effort from all types of curated sources who volunteer their time and resources.

Used to learn about your own Digital Rights, for compliance or to teach an audience, **Sirocco** is a powerful tool that will no doubt assist in raising awareness on this fundamental subject.
IDENTIFYING THE PROBLEM

DIGITAL RIGHTS
Digital Rights are still a rather unknown concept among societies. However, they stem from Human Rights in that digital existence is becoming commonplace all across the world.

REGULATIONS
Different governments have taken different approaches in regulating Digital Rights. To this date however, there is no agenda for a [Universal Declaration of Digital Rights](#).

JURISDICTIONS
The confusion is further increased when a number of jurisdictions are to be applied on the data, sometimes even overlapping each other.

PROCEDURES
Even when regulations are in place, the procedures are more often than not obscure for the non-expert. How to exercise the rights brought upon by those regulations can become a labyrinth.

TOO MUCH DATA

CONFUSING & SPECIALIZED PROCESSES

NO EXISTING CONSOLIDATED INFORMATION
To this date, there is no consolidated set of information that gives a clear, concise and visual picture of the state of Digital Rights.

DIGITAL RIGHTS NOT ENFORCED
This lack of information is not conducive to ensure that Digital Rights are enforced.

USERS DEFENSELESS
As a result, individuals are for the most part improperly informed and therefore cannot meaningfully defend their Digital Rights.
HOW DOES SIROCCO HELP

A GLOBAL VIEW INTERACTIVE MAP ON DIGITAL RIGHTS
Sirocco is an interactive map that consolidates worldwide information about Digital Rights and related topics.

LAYERED INFORMATION
The information is configured in layers to facilitate the understanding of overlapping subjects.

CUSTOM FILTERS
Filtering the information can be done based on a number of criteria.

CONSOLIDATED INFORMATION
The resulting map provides an overlook at the consolidated set of data.

FEATURES

GIVES CLARITY & ORIENTATION
By consolidating in a single place all the information needed, taking action is simplified.

HISTORICAL EVOLUTION
Sirocco allows to have a glance at how Digital Rights (and related subjects) have changed over time.

UPDATED BY FIRSTHAND SOURCES
The information contained in Sirocco is updated by field specialists, engaged humanitarians and professional organizations.

PEER REVIEW
All the sources are indicated and subjected to peer review.
WHO CAN BENEFIT FROM SIROCCO?

COMPLIANCE
Sirocco helps evaluate the impact of the jurisdictions and regulations that apply on a case basis.

RAISE AWARENESS
Designed as a tool to raise awareness, to understand Data Protection compliance and to enable enforcing Digital Rights in an ever growing digital society.

LEARNING
Built to be used as a tool to showcase different scenarios and turn learning into a much more engaging and participatory experience.

INSIGHT
Structured to obtain first hand information on Digital Rights and access the regulations applicable to each jurisdiction.

COST ANALYSIS
Sirocco helps estimate the cost of implementing these regulations in daily operations.

POLICY MAKING
Governments play a crucial role in protecting people by means of effective regulations. By providing a global view of Digital Rights, they can identify proper needs and adapt policies accordingly.

INDIVIDUALS
EDUCATORS
LAWYERS
ORGANIZATIONS
BUSINESSES
BODIES OF GOVERNANCE
